Aim: To write a diary account of the F3 2013 tornado in Moore, Orlando

Dear Diary,

On the News this morning, we were warned that the F3 tornado was coming towards our town! Immediately, my family started preparing to go to the cellar. We packed crisps, noodles, water, blankets, drinks, clothes and pillows also torches, games and a toothbrush each. We packed our games just in case we were there for more than three days.

Scared and frightened, my mom turned the radio up so we couldn't hear the noises from outside. My dad was playing games with my brother while my mom and I were listening to the radio. I felt scared because sirens were going off really loud and things were going up and down also, people were crying because furniture was broken.

Eventually, the tornado stopped and you could see birth certificates, rings and memorable photographs outside the rubble of the buildings. On every programme channel the News was on about the devastating tornado!
